

## Knightsbridge (5 colours)

Knightsbridge is a beautifully rich, full grain, aniline dyed leather. It is smooth and silky to the touch and the further addition of waxes and oils enables a pull up effect when the leather is stretched. This type of leather marks when lightly scratched or scuffed, this gives a pleasing variation to each piece of furniture. which will also result in a more relaxed lived in appearance with use. Due to the finishing of this type of leather a pleasing aroma is also clearly in evidence. Pull up type leathers do not have a consistent colour and due to the nature of the leather, should be protected from direct sunlight, and not placed close to radiators, which will cause rapid fading of the colour. Evidence of marks and scarring will be seen in the finish. Each hide is unique and swatch samples should be regarded as no more than a guide, for these types of leathers.

### SPECIFICATIONS

<b>Category:</b>	Aniline
<b>Raw Material:</b>	European
<b>Country of Origin:</b>	Italy
<b>Average Hide Size:</b>	55 Square Feet
<b>Average Thickness:</b>	0.9 - 1.1 mm
<b>Test Method:</b>	ISO 2589
<b>Test Method:</b>	ISO 5402
<b>Colour Fastness To Light:</b>	Min 3 Blue Scale
<b>Test Method:</b>	EN ISO 105-B02
<b>Colour Fastness To Rubbing:</b>	Dry 50 Cycles - Min 3 Grey Scale Wet 20 Cycles - Min 3 Grey Scale Perspiration 20 Cycles - Min 3 Grey Scale
<b>Test Method:</b>	EN ISO 11640, EN ISO 11641
<b>Finish Adhesion:</b>	Min 2 N/10mm
<b>Test Method:</b>	EN ISO 11644
<b>Tear Strength:</b>	Min 20 N
<b>Test Method:</b>	EN ISO 3377-1
<b>California Technical:</b>	Class 1
<b>Test Method:</b>	Cal Tech Bulletin 117
<b>Cigarette Ignition Resistance:</b>	Class 1
<b>Test Method:</b>	UFAC/NFPA 260
